

Devoted to create. Committed to perform.

Quality Engineer - Quality Assurance (m/f/d)

CTI Systems S.à r.l. is a leader in the supply and installation of integrated automated manufacturing solutions in the area of heavy loads. Our portfolio includes automated material handling solutions, storage systems, surface treatment installations, assembly lines, software solutions for production control (MES) and integration of machines and installations from other suppliers.

Your responsibilities:

- Further development of advanced quality planning as well as implementation and evaluation of advanced quality planning
- Creation of QA inspection plans and inspection instructions and coordination of measurement and gauge planning
- Support and moderation of risk analyses such as FMEA and participation in corrective and continuous improvement measures
- Processing internal and external complaints in the project phase using 8D reports
- Planning and monitoring the quality requirements for supplier parts, recognising and presenting deviations in parts procurement
- Supporting responsibility for development quality during the product development process at the supplier
- Supporting the purchasing department in selecting and evaluating suppliers and carrying out internal and external process audits
- Internal and external quality validation

Your profile:

- Mechanical engineer, technician or master craftsman
- Knowledge of the ISO 9001 or ISO 9100 standard
- Experience in advanced quality planning
- Application knowledge of 8D report, 5Why, PLP, Ishikawa diagram and product/process FMEA
- Command of English and French or English and German (command of the three languages is a real advantage)

We offer:

- A challenging job in an international and ambitious company
- An attractive remuneration package
